Acadis® Readiness Suite

The Acadis® Readiness Suite is a proven, enterprise-class software solution that simplifies the complex operational training tasks common to the high-risk, high-volume blended training environments of law enforcement, public safety agencies (federal, state, and large metros) and the military. In addition to modernizing training operations, Acadis® provides detailed tracking and documentation of classroom, online, and live skill instruction, including assessment and curriculum details, ensuring a complete and detailed training record for agencies and individuals regardless of the method of training delivery. Acadis® automates and integrates costly standalone training functions and tracks a variety of resources throughout their lifecycle, thereby facilitating an accurate forecasting of current and future physical, technological, and human resource needs. In sum, Acadis® saves time and money through the consolidation of existing systems and the streamlining of workflows into a single framework.

Acadis® consists of the training management system and a series of supporting software modules, which are configurable to support the full spectrum of training operations. These modules work in tandem to support and manage online and in-person classes, high-liability training, and complex training and business processes. The modular system provides software to support specific areas of training management across an individual's entire career.

Acadis® is a database framework that collects, organizes, and retains data essential to training and administration for government employees. Depending on their particular role in the organization, users can access Acadis® via various portals, which are specifically designed for general employee use, test-taking and administering, student registration, and other functions. This gives each user quick access to the Acadis® features that they need while protecting data security and requiring minimal training.

Unlike other training management systems, the Acadis® Readiness Suite is designed specifically for the demands of government agencies. Also, unlike most other systems, it is authorized at the FedRAMP Moderate Impact level and is Criminal Justice Information Services (CJIS) compliant. This benefits agencies that utilize cloud-based services by providing an advanced, consistent security standard, which is subject to continuous monitoring and audits in order to keep data protected even as security threats evolve.

Memorandum of Understanding and Release

ENVISAGE Technologies, LLC ("ENVISAGE") has licensed a software program referred to generally as the Acadis® Readiness Suite ("Acadis") to the Texas A&M Forest Service ("TFS").

TFS has requested relaxed IP address restrictions on its instance of Acadis to permit logins to the administration page from all non-blacklisted IP addresses originating in the United States. Although willing to make this modification to TFS's instance of Acadis, subject to the conditions provided herein, ENVISAGE has advised TFS that this modification is not in accordance with Acadis standard practices.

TFS recognizes ENVISAGE's advice against this modification, but desires to continue nonetheless. TFS therefore represents and warrants that the requested removal of IP address restrictions meets all security requirements referenced within its contract for Acadis, and agrees to release ENVISAGE from liability that might occur as a direct or foreseeable result of this modification.

This Memorandum of Understanding and Release, signed on the date below, is effective immediately on the earliest date indicated below.

General Understanding & Release

ENVISAGE Technologies, LLC (hereafter referred to as "ENVISAGE") has licensed a software program referred to generally as the Acadis® Readiness Suite to the Texas A&M Forest Service (hereafter referred to as "TAMFS").

TAMFS has requested that their production admin portal of the Acadis Readiness Suite be modified to increase the software "automated logout" feature on their admin portal site from the industry standard of twenty (20) minutes, to one hundred twenty (120) minutes. To wit, instead of using the Acadis admin portal's built-in timeout, TAMFS desires to use its own timeout which is employed through its single-sign-on system. This alternative timeout has an adaptive approach allowing the user to continue working if an action is taken during a 30-minute interval. If no action is taken after 30 minutes, or the browser is closed, the user is logged out. These intervals can continue for up to four hours, at which time, the user is required to re-authenticate regardless of activity. This timeout strategy is a firm part of agency security policy and its associated inactivity window duration was chosen after careful risk management discussions.

TAMFS recognizes that this modification does not necessarily reflect the most stringent level of security available within Acadis, and desires to continue nonetheless. Therefore, TAMFS agrees to release ENVISAGE from liability that might develop as a direct or foreseeable result of this modification.

This General Understanding & Release, signed on the date below, is effective immediately on the date indicated.
